Damietta 🏠

SUMMARY

Back-End (.Net) developer highly skilled and passionate about learning the best in designing and implementing efficient and scalable applications. I am looking for a good position where I can extend my programming experience,I possess an insatiable appetite for knowledge and possess an aptitude for rapid learning.

EDUCATION

Computers and Artificial Intelligence , Damietta University

senior Student
2020-2024

SKILLS

- C#
- SQL
- Entity Framework
- Asp.Net Core MVC
- LINQ
- OOP
- Data Structure
- WinForms
- Design Pattern
- SOLID Principles

CERTIFICATIONS

- (innovators Support Fund) Participation in innovation Catalyst
- (Nile University) Participation in 3rd Egyption Junior Research Competition-14th UGRF
- (Arab Council for the gifted & talented) Participation in the activities of the international Scientific 15th Conference for the Gifted and Talented

EXPERIENCE

Training .Net MVC

Summer Training in ITI Mansoura
- i trained for a month with an elite group of instractors and learned how to work on websites and the basic skills to complete the project in the fastest time and in the best way

Projects

- Game Zone 💼

Website used in it CRUD operation using EF and Identity with Roles for admin and users by .Net Core MVC

- Education website (Real Application)

I have been working on it for a month. It is a site that displays educational videos, with the user categorized into secondary stages, and the ability for each stage to access the summaries in the pdf files or to watch its own videos after the Admin allows the student to watch the video. There is also control over the videos for all students, just as you control the student. As for the video, it can be accessed. There are Exams, some of which are optional(MCQ) and are automatically corrected, or essays. The student uploads a file that the Admin can see and on the basis of it gives him the grade. The student table is immediately updated with the grade with the student's name and the name of the exam he took.
There is also a special section for courses in general. The Admin can add a new course. The same is true for students who apply for this content. Admin can accept them and see their grades in their exams.
